

GLOUCESTERSHIRE ENERGY-from-WASTE (EfW) FACILITY  
HARESFIELD, GLOUCESTERSHIRE  
Project Update Bulletin No.1  
July 2016

Welcome to the first project update bulletin for the Gloucestershire EfW Facility. The bulletin will be issued by email directly to those who have requested to be kept informed and to members of the Community Liaison Group. Each one will be made publicly available on UBB's Gloucestershire project website.

Construction of the EfW plant is due to commence in September 2016 at Javelin Park, near Junction 12 of the M5 motorway.

As a prelude to construction starting, the construction contractor UBB (a joint venture between Balfour Beatty and Urbaser) will commence site preparation works this week. This includes:

- Installation of the perimeter fencing, security and access control.
- Ground preparation (levelling, construction laydown and working platforms).
- Preparation of temporary pathways and construction vehicle routes.
- Installation of the temporary construction 'village' for construction personnel.
- CCTV installation.
- Location of services and utilities, and installation of construction utilities.

All the relevant permissions are in place to allow this work to progress. Access to the site will be via the dedicated roundabout on the B4008. The groundworks associated with these activities will not generate quantities of spoil for off-site disposal. Such excavated materials will be retained on site for screening and amenity bunding.

UBB will have a manned office on site from around 18<sup>th</sup> July 2016.

All construction activity will be undertaken with reference to a Construction Environment Management Plan (CEMP). This document, which was approved by the planning authority pursuant to Conditions 6 and 7 of the planning permission, sets out how the contractor will manage the construction activity and mitigate environmental impacts. We shall be uploading the CEMP on to the project web site very shortly.

If you have any enquiries about the construction of the Gloucestershire EfW facility, please email [info@ubbglooucestershire.co.uk](mailto:info@ubbglooucestershire.co.uk) or contact Ian Barber on 07785 955 675.

There will be an emergency out-of-hours contact phone number which will be available shortly. This will be posted on the site entrance notice board, uploaded to the website and included in the next update bulletin.
